Receive up to \$160 off your bill and get a web-programmable thermostat (a \$150 value) or outdoor switch professionally installed at no charge.

Make saving money and energy automatic. With Energy Wise Rewards, we will automatically cycle off and on your central air conditioner or heat pump on Peak Savings Days when demand for electricity is highest. The difference in temperature is only a few degrees and your air conditioner fan stays on so you'll stay comfortable. We do all the work, you save the money.

Saving money this summer is as easy as 1-2-3.

- 1 SIGN UP FOR ENERGY WISE REWARDS. Call 1-866-353-5798 or visit pepco.com/rewards.
- 2 CHOOSE YOUR PLAN. Select your program options and receive \$40-\$80 in Annual Reward Credits off your bill.
- 3 CHOOSE YOUR DEVICE. Get a professionally installed web-programmable thermostat or outdoor switch and receive a one-time Installation Credit of \$40-\$80 off your bill.

With Energy Wise Rewards™ from Pepco, the savings are automatic.

Save even more with

PEAK ENERGYSAVINGS CREDIT

With the Peak Energy Savings Credit, all customers in Maryland can take control and reduce their energy use to save even more money. The day before a Peak Savings Day, you'll receive a call so you can be ready to save. Then, make small changes to reduce your energy use such as waiting to run a load of laundry or turning off unneeded lights. There is no enrollment necessary. You'll receive \$1.25 off your bill for every kilowatt hour (kWh) you reduce your energy use below your baseline on the Peak Savings Day. For example, if your baseline is 19 kWh and you reduce your usage to 12 kWh, you'll receive an \$8.75 credit. For more information about the Peak Energy Savings Credit visit pepco.com/peak or call 1-855-730-PEAK (1-855-730-7325).

The less energy you use, the more money you can save.

Maximize your savings. Sign up for Energy Wise Rewards and participate in the Peak Energy Savings Credit.

Saving is easy with

energy wise rewards Maryland

Maryland

It's the automatic way for customers with central air conditioning to save money and energy.

▼ EVERYTHING YOU NEEDTO KNOW IS INSIDE

pepco.com

Lowering the demand for electricity helps to conserve resources that otherwise would have been used to generate energy.

PROMO CODE: PMDRDE1302

With Energy Wise Rewards from Pepco, the savings are *automatic*.

HERE'S HOW IT WORKS

Sign up and we'll professionally install a web-programmable thermostat or outdoor switch at no charge. You'll receive an Installation Credit of \$40-80 off your bill based on the cycling level you choose. Then, during a Peak Savings Day when demand for energy is highest, we'll automatically cycle off and on your central air conditioner or heat pump to help manage energy use. The difference in temperature is only a few degrees, and your air conditioner fan stays on so you'll stay comfortable while saving money.

WHEN CAN I EXPECT CYCLING TO HAPPEN?

Peak Savings Days occur about five times a year between June and September and usually last 4-6 hours. Your participation can help save energy and balance the region's demand for electricity.

SIGN UP TODAY

Make saving money automatic – visit pepco.com/rewards or call 1-866-353-5798.

Choose your plan

Cycling Level	Temperature Increase	Installation Credit*	Annual Reward Credit**	Total Rewards for your first 12 months***
50%	1-3 degrees	\$40	\$40	Up to \$80
75%	2-4 degrees	\$60	\$60	Up to \$120
100%	4-7 degrees	\$80	\$80	Up to \$160

Most people start with 50% cycling.

*A one-time credit off your bill.

**Annual Reward Credits are paid monthly, June through October.

***You receive rewards for each thermostat or outdoor switch.

Choose your device

Web-Programmable Thermostat

You can change the settings manually or remotely through the Internet.

During a Peak Savings Day, your webprogrammable thermostat allows us to automatically cycle your system off and on for a few hours when demand for electricity is highest. You have the power to control your temperature settings year-round from home or anywhere you can access the Internet. Plus, choosing energysaving settings for everyday use can save you up to 10% on heating and cooling costs.†

OR

Outdoor Switch

A small device installed outside, near your central A/C unit.

Do you already have a web-programmable thermostat of your own? We'll install a switch outdoors near your central air conditioning unit. You won't need to be home as long as your system is easily and safely accessible. Take advantage of an outdoor switch so we can cycle your system off and on during a Peak Savings Day.
